Infrastructure?**

U.S. Crude Oil Imports by Source

U.S. Oil Production and Imports

*Domestic production includes crude oil, natural gas liquids, and other hydrocarbons and alcohol production, but does not include refinery gain

Iraq contains 112 billion barrels of proven oil reserves, the second largest in the world (behind Saudi Arabia) along with roughly 215 billion barrels of probable and possible resources. Iraq's true resource potential may be understated, as deeper oil-bearing formations located mainly in the Western Desert region could yield additional resources, but have not been explored.

Saudis Pay for Suicide Terrorists

The Saudi Arabian regime has paid at least \$33 million to families of Palestinian suicide bombers and others killed or injured in the fight against Israel. Also, according to Arabic news agencies and the Saudi Embassy's Web site, in December the regime set aside an additional \$50 million in rewards.

Asked about the Saudi fund, Secretary of State Colin Powell told NBC News, "Anytime you incentivize in any way this kind of activity, you are contributing to the activity."
